

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

PS .. You guys don't realize that half of Americans wages are dropping and most of the good paying jobs are being sold out to Overseas jobs . For christ sakes . stand up for your voters once in a while and don't succumb to corporate greed . If I ran a business the way you guys run the government , I would be in jail . or out of business, But I suppose if you get enough under the table benefits from Big Business you will vote the way they pay you to .. I bought my wife and my mom a TracPhone this Christmas as we can't afford a 40 dollar a month expense . But with a stepson having to be dropped off a considerable distance away . I felt this was a safety issue that we could prepay and use for safety alone at an affordable cost . your already taxing our regular phone to high heaven . leave this option ALONE .

Sincerely,

Todd Omernik
